

Using Your *Histamine Bundle*

You have a powerful collection of supportive supplements and knowledge in your hands.

Your **Histamine Bundle** supports three key areas—gut, blood, and cell membranes—which in turn support overall healthy histamine levels.†

How Each Product Works

Histamine Digest™ :

This helps you break down histamine in the gut before it becomes a problem. If histamine doesn't get broken down in the gut, it gets absorbed into your blood, causing histamine to flow throughout your entire body— brain, uterus, heart, lungs, and skin, to name a few. It's very important to support healthy histamine levels in the gut.†

ProBiota™ HistaminX™:

Contains 7 probiotic strains of bacteria that have been selected to support healthy histamine levels. **ProBiota™ HistaminX™** supports healthy histamine levels in the gut.†

Histamine Nutrients:

Once histamine is released into the body, it gets into the blood and various organs. **Histamine Nutrients** provides nutrients that support healthy whole-body histamine breakdown.†

HistaminX™:

The bioflavonoids, enzymes, and other plant compounds found in **HistaminX™** work together to help calm mast cell activation, support a healthy immune system and an appropriate inflammatory response.†

Dirty Genes: The Histamine Workbook:

A quick-reference book that distills down everything you need to know about histamine—saving you time and increasing results.

Getting Started

* *Histamine Digest™* ——— *

There are two ways to use this product:

With food:

Taking 1 capsule before eating or drinking helps break down histamine found in foods and drinks. You can take this any time of day or night and as many times a day as needed. Some people take it with every meal. Some take it with just wine or when eating high-histamine foods. This will help keep histamine at a healthy level and eliminate feelings related to histamine intolerance.†‡

Away from food:

Your symptoms may not be due to the histamine content of your food. It may be that you have an imbalance in your microbiome and have an overpopulation of histamine-producing bacteria in your gut. Take 1 capsule anytime at least 30 minutes away from food or drink. This way, **Histamine Digest™** focuses on digesting the histamine from the microbes in your gut instead of the food or drink.†

Gastrointestinal issues?

Take 1 capsule of **Histamine Digest™** on an empty stomach to see if you feel better within 30 minutes. If you do, keep taking it away from meals for a period of time in addition to taking it with food and drink.†

Additional tips

Take **Histamine Digest™** away from food or drink to support:

- ✿ Uterine comfort during the menstrual cycle.†
- ✿ Occasional nausea during pregnancy.†

✿ *Histamine Nutrients* ——— ✿

If you're experiencing histamine symptoms and need to support healthy histamine levels, take 2 capsules.†

You may use this at any time of day or night, with or without food, and as needed, multiple times a day or night.

If you take away from food on an empty stomach, you may experience a niacin flush. A niacin flush is a warm sensation experienced, especially in the skin of your face, hands, and chest. It goes away within about 20 minutes and is not harmful.

Consider taking 2 capsules before bed to support a healthy onset of sleep.†

✿ *ProBiota™ HistaminX™* ——— ✿

After dinner, take 1 capsule. This is the best time to take probiotics. While **Histamine Digest™** may have an immediate effect (within 30 minutes), **the unique blend of histamine-balancing bacteria found in ProBiota™ HistaminX™ works to support healthy microbiome balance over time.** It's best to take this supplement every evening long-term.†

✿ *HistaminX* ——— ✿

HistaminX is designed to provide fast-acting, additional antioxidant support during periods of high pollen and seasonal sensitivities.†

You should assess how you're feeling on a day-to-day basis and take **HistaminX** accordingly. If you're feeling the discomfort of seasonal sensitivities, take 2 capsules without food any time of day or night as needed. If you're not affected by seasonal sensitivity symptoms on a particular day, then you don't need to take **HistaminX.**†
